Members**

MARCH 2005

Web Site Hosting Service

Your customers and clients are using the Internet more and more every day, so having a reliable Web site has never been more important. Every Web site on the Internet must be “hosted” on a server that has an uninterrupted, high-speed connection to the World Wide Web. Costco has teamed up with dotCanada.com to offer this comprehensive Web hosting service exclusively to Costco Executive Members. Whether you have an existing Web site or are creating a new one, this package has what you need.

Software and Features

With 5 Gb of disk space, 200 Gb of monthly data transfer and 1000 e-mail accounts included, your Web site will have plenty of room to develop and grow. Other features include free auto-install scripts, shopping cart and FTP software, Urchin Web statistics and up to 50 MySQL databases.

Free Web Site Design Software

When you sign up, you will also receive a copy of NetObjects Fusion 8 (a \$240 value). Use this powerful software to create your own dynamic Web site from scratch or from the templates provided.

Secure and Reliable Service

All packages offer a shared SSL (Secure Sockets Layer) certificate so you can securely handle sensitive personal and credit card information. When you host with dotCanada.com, you can choose either Windows or Linux platforms, both with a 99.9% uptime guarantee.

The Support You Need

Toll-free telephone support is available from 9 a.m. to 5 p.m. Eastern Time, Monday through Friday.

Your service includes:
