### Additional Information and Other Important Tips

The first thing to consider when designing a living room is to remove all the furnishing in the place to determine the total living room size. Sweep the floor and mop to remove dust and dirt. If the flooring is carpeted, you need to vacuum the carpet before decorating the place.

Find the center of the area. This will help you determine the furnishings that will suit the living room size. Prioritize the furnishings that you will include in the room. If you want to have a large seating capacity, then the best thing to do is to allot sufficient space for the sofa. Instead of a small table or a corner table, you can put a carpet and place throw pillows on the carpet. You can place large couches, a recliner and a loveseat if seating is your priority.

Aside from couches, the other furnishings that can be added in the living room are bookshelves as well as an entertainment center. When looking for furnishings, make sure that the furnishings are attractive and have the same shade. Assign a theme for the living room before buying furnishings.

To make the place more relaxing and comfortable, you can add different accessories such as a ceiling fan, curtains, wall hangings and lamps. The other accessories that can be added are rugs, wall decorations, and accent figurines. This document is provided for informational purposes only.
