

TOP 5 FREQUENTLY ASKED QUESTIONS

1.) **How thick does my concrete have to be?**

Answer:

For the MaxJax and Commander 7000 we recommend minimum 4 inches/3000 PSI.

2.) **How high do my ceilings have to be?**

Answer:

You will need to get overall height of lift and add an additional 6 inches.

For example: For the Commander 7000 and 7000X – if you intend on "stacking cars", then your minimum garage height will be determined by adding the height of both cars and then adding six (6) inches.**

For the **Max Jax** = 89 inches plus 6 inches = 95 inches

3.) **What is the warranty on Dannmar lifts?**

Answer: 3 years structure/1 year parts.

4.) **How far does my 2-post have to be from the rear wall?**

Answer: 8 feet

5.) **Does Dannmar service its lifts nationwide?**

Answer: Yes. Dannmar has service centers nationwide
