This catalog is published based on April 2010. The images of the catalog might be slightly different from the real product.
SMART DETERGENT SYSTEM

Smart detergent System is a innovative equipment for using detergent, bleach and softener washing machines with a autoload sensor weigh laundry, put the optimal amount automatically, thus, this system prevents waste of detergent.

- 45 times of use in total is available with one time supplementation.
- Using liquid washing materials, cold water washing is expected as same performance as washing in warm water.

AUTO ALARM

When it is time to fill up detergent, both an LED display and an alarm automatically notice the user to supply detergent.

BLEACH

When you want to put bleaching agent, press the ‘Bleach’ button.

USEFUL 10 PRESET CYCLES

10 preset programs are designed to meet all of your laundry needs. Whether it’s normal, cotton, delicate, or wool, the smart 10 programs are designed precisely to handle different types of loads.

1. **Speed Wash**
   - Speed wash cycle enables light clothes to be washed quickly. As it takes only 31 minutes to finish washing, this course will be completed during your meal!

2. **Sanitary**
   - Sanitary is for clothes like underwear, T-shirts made of white cotton materials, socks, towels, and so forth directly touching your skin. Washing clothes in hot water will enable sterilization and deodorization.

3. **Custom Program**
   - Users can program frequently-used programs. Once programmed, users can recall the setting whenever needed.

4. **Night Time**
   - Night time is useful when operating the machine at late night. By reducing noise, you can sleep like a top.

5. **Pump Filter**
   - While water flows out, the pump filters dust, so laundry could be even cleaner.

6. **Delay Wash**
   - In case users want to program the washing cycle to finish up maximum 12 hours later, this option is useful, especially if different electricity rate are changed based on time zones.

7. **Rinse + Spin**
   - To smooth out & soften your clothes which were left area for quite some time after washing.

8. **Steam Wash**
   - Steam helps to remove laundry smell, press Steam Button.

9. **Baby Care**
   - Special care is available for baby skin; babies are susceptible to atopic dermatitis, sensitive to allergies.

10. **Drum Cleaning**
    - Monthly cleaning for a tub interior using ‘Drum cleaning cycle’ is recommended; this will remove fine residues and water stains.

SAFETY

- **Child Lock**
  - Child Lock prevents unwanted situations where children push wrong buttons and disturb washing cycles.

- **Door Lock**
  - To prevent accidental opening, the door stays locked throughout the cycle.

- **Auto Diagnosis**
  - When there is malfunction, display will let user know the problem so that proper steps can be taken to repair the units safely.

DIRECT DRIVE MOTOR

The advanced brushless DD motor rotates the drum directly without belt and pulley. As the power is directly delivered to the drum, unwanted vibration and noise are minimized, and energy consumption is optimized.

4.5 CU FT

A spacious drum capacity of 4.5 cu.ft. enables washing large bath towels and all types of bulky bed linens. This simple tub brings convenience to families with large laundry needs.

4 POINTS SUPPORTING DAMPER

Firm 4-points damper keeps the drum at an optimal angle, delivering most stable movement and balance during washing and fast spin-drying.

SAFETY

- **Child Lock**
  - Child Lock prevents unwanted situations where children push wrong buttons and disturb washing cycles.

- **Door Lock**
  - To prevent accidental opening, the door stays locked throughout the cycle.

- **Auto Diagnosis**
  - When there is malfunction, display will let user know the problem so that proper steps can be taken to repair the units safely.

and temperature automatically, from checking the weight of laundry. In manual dry mode,

SENSOR DRY & MANUAL DRY

EASY TO USE

Various user-friendly functions make the operation of the dryer easier.

Technical Advantage

✦ Minimizing Energy Loss

Energy loss is minimized by preventing the loss of heat.

✦ Saving Drying Time

Pre-heating system increases internal temperature much quickly.

✦ Optimal Drying Performance

With low energy and short time.

STEAM GENERATOR

Steam generator creates steam with water under high pressure. After water is boiled, steam spouts out immediately. Visual effects are maximized at the front door.

Steam Refresh

Strong steam prevents creases or wrinkles on laundry and enables you to feel neat and tidy as if you were wearing new clothes.

Wrinkle Care

To prevent the laundry becoming wrinkled the washing tub rotates for about 10 seconds every 10-15 minutes. (Only for cotton & Synthetic course)

Air Dry

Damp or lustrous clothes due to long storage inside closets or drawers are treated with warm air, which will make them neat and tidy for you to wear right away.

Rack Dry

When drying delicate articles like knittedwear, sweaters or shoes, a rack may be used to prevent deformation.

Custom Program

Users can program frequently-used drying cycle.

Door Open Sensor

Operating a dryer with its door open can be very dangerous because the machine emits hot steam. To prevent such hazard, a signal is turned on when the door is open.

Child Lock

Child Lock prevents troublesome situations where children push wrong buttons and disturb drying cycles.

Error Code Alarm

In case of the dryer malfunctions, ‘Error Code Alarm’ goes off to guide users for troubleshooting.

STEAM GENERATOR

Steam generator creates steam with water under high pressure. After water is boiled, steam spouts out immediately. Visual effects are maximized at the front door.
