

## **Blanco Silgranit**

Daily cleaning may be done with any non-abrasive cleaner (i.e. Bar keeper's friend, Soft Scrub with Bleach, or dishwasher soap). After every use, rinse and wipe the sink dry with a clean, soft cloth to eliminate any water spots or soap film build-ups.

Normal Stains – for stains, please use a mild abrasive cleaner, along with a soft scouring pad. Stubborn Stains – A solution of 50% bleach, 50% water should only be used for tough, stubborn stains. Let the solution sit in the bottom of the sink for one hour; then scrub. Rinse well. Also, the use of Bar Keeper's Friend will help remove stubborn stains. (NOTE: with Anthracite or Café Brown, sink must be rinsed thoroughly with hot water).

To remove Calcium deposits, use Lime Away or CLR cleaner.

### **DO NOT USE:**

- Abrasive cleaning agents or scrub pads, such as Steel wool
- Straight bleach
- Commercial alkalis, such as ammonia and/or caustic solutions
- Drain blocking chemicals that involve filling the sinks with water
